

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

## PLAT OF DOUBLED WHEAT STRAW.

*The SILVER CERES MEDAL was this session given to Mrs. LOWREY, of Exeter, for a bonnet made of doubled wheat straw.*

IN common plat, of split straw, the folds are alternately shining and dull, on account of their presenting to view alternately the outside and inside of the straw. In the candidate's plat each single straw is replaced by a double one, consisting of two pieces having the shining or external surface of each placed outside ; the consequence of which is a plat with a high degree of lustre, which varies according to its position in respect to the light.
